

CONSUMER BUNDLE — QUICK-START GUIDE | VERSION 1.0

Your Execution Path for Frameworks 1, 2, 3 & 4

Engineered by **Jackie Grandison**
Senior IT Systems Technician | AI Subject Matter Expert | jackiegrandison.com

YOUR FRAMEWORK INDEX

#	Framework	Best For
1	Landlord Protection & Lease Dispute	Tenants fighting uninhabitable conditions, fees, or deposit withholding
2	FDCPA Debt Collection & Creditor Resolution	Consumers disputing aggressive or unverified debt collection
3	Formal Administrative & Fee Dispute	Consumers fighting unauthorized bank fees or corporate charges
4	Insurance Claim Denial & Coverage Appeal	Consumers appealing denied health, auto, property, or renters claims

GET STARTED IN 4 STEPS

1 Choose Your Framework

Open your Consumer Advocacy Bundle. Match your situation to the correct framework using the index above. Read the Use Case to confirm it fits before copying the prompt.

2 Fill in Your Variables

Copy the full prompt block. Replace every bracketed variable with your actual details. Do not leave any brackets unfilled — incomplete variables produce generic output that will not carry legal weight.

3 Paste into Any AI Tool

All frameworks are tool-agnostic. Use Claude, ChatGPT, Google Gemini, Grok, DeepSeek, or any AI chat model you already have access to. No new account required. Free tiers are sufficient.

4 Review, Verify, and Send

Read every word of the generated letter. Verify names, dates, amounts, and statute references against your state's laws. Send via certified mail or email with read receipt as directed in the framework's Execution Roadmap.

OUTPUT VALIDATION CHECKLIST

- ☐ All bracketed variables replaced with real, accurate details
- ☐ Names, dates, and dollar amounts verified as 100% correct
- ☐ Tone is professional and objective — no emotional language present
- ☐ State-specific statutes verified against your jurisdiction's laws
- ☐ A clear demand or requested action is stated
- ☐ A specific deadline or cure window is included
- ☐ Escalation consequences explicitly stated
- ☐ Your name, contact information, and signature line are complete

Common Mistakes to Avoid

- **Sending with unfilled brackets:** "[Insert State]" in a sent letter destroys credibility immediately.
- **Adding emotional language:** These frameworks produce objective output. Emotional additions weaken the document's legal posture.
- **Skipping state verification:** Statutes vary significantly by state. Always verify before sending.
- **Sending without review:** AI output requires human review. Read every line before signing and sending.
- **Not keeping records:** Save the letter, the date sent, and delivery method. Documentation is your strongest asset.

FREQUENTLY ASKED QUESTIONS

Q: Which AI tool should I use?

All frameworks are tool-agnostic — use whichever AI chat model you already have access to. Claude, ChatGPT, Google Gemini, Grok, DeepSeek, and others all produce strong results. You do not need to create a new account. Free tiers are sufficient.

Q: Can I edit what the AI produces?

Yes — and you should. The AI output is a structured starting point. Adjust any language that doesn't fit your situation precisely, and always verify legal references before sending.

Q: Is this legal advice?

No. These are educational frameworks for drafting strategic communications. For legal advice specific to your situation and jurisdiction, consult a licensed attorney.

Q: What if the statute reference in my letter is wrong?

Remove or correct it before sending. Search your state's official government website or State Attorney General's consumer protection page to verify the correct code.

Q: Can I reuse these frameworks for multiple situations?

Yes, without limit. Update the variables for each new dispute and run a fresh prompt each time for the strongest output.
